EDUCATION

Higher education

BSU/Faculty of Radiophysics and Computer Technologies, Physical Electronics

09/2017 – Present

Minsk, Belarus

WORK EXPERIENCE

Unfortunately, I haven't a big experience. But now I want to get a job. I know that most people say that I still have a lot to learn before going to work. And I will agree with that. Yes because I want to become a front-end developer, and I know that technologies are developing every day, and the network is developing even faster. And I know that I have to learn all the time to become a good specialist. I believe that everyone should do their work to the end and achieve their goals. And the network is developing rapidly, which means that new goals are being set and new skills are needed to achieve them, which need to be learned. Therefore, as they say in the movie "Jobs," "we do not stop at what has been accomplished and never stop inventing" you cannot stop, especially if you are only at the beginning of the journey.
